Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The examiner contacted applicant's representative regarding the limitation of claim 1. The limitation of claim 1 of "recovering energy" was agreed as not the best way to describe the method of the present invention, since the applicants recover polyvinyl butyral as energy source. The examiner indicated that the 112 rejection will be raised and the language of the claim will have to be corrected according to the support the found in the specification.

(A fuller description, if necessary, and a copy of the amendments which the examiner agreed would render the claims allowable, if available, must be attached. Also, where no copy of the amendments that would render the claims allowable is available, a summary thereof must be attached.)

THE FORMAL WRITTEN REPLY TO THE LAST OFFICE ACTION MUST INCLUDE THE SUBSTANCE OF THE INTERVIEW. (See MPEP Section 713.04). If a reply to the last Office action has already been filed, APPLICANT IS GIVEN ONE MONTH FROM THIS INTERVIEW DATE TO FILE A STATEMENT OF THE SUBSTANCE OF THE INTERVIEW. See Summary of Record of Interview requirements on reverse side or on attached sheet.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-3 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

In the instant application, the applicant claims method for recovering energy. At the same time the specification recites method of recovering polyvinyl butyral and its use as energy source replacing fossil fuels. The method of recovering energy is not disclosed, especially when polyvinyl butyral is a static compound.

Upon conversation with the applicant's representative, the examiner, for more prompt prosecution of the application, will treat claim as claim recycling polyvinyl butyral energy source.

*Allowable Subject Matter*

3. Claims 4-5 are allowed. The prior art found against present claims, WO 02/14413 to Maurer discloses process of separating polyvinyl butyral from car windshields. The solvent mixture in the prior art of Maurer includes acetone with ethanol or as per claims any alcohol having 1-5 carbon atoms. The prior art of Maurer was not applied against present claims, although it is very applicable, since its publication date (both DE and WO patents) are after the filing date of the present invention.

4. Claims 1-3, rejected under 112 2<sup>nd</sup> paragraph comprise inventive step of using polyvinyl butyral as an energy source instead of fossil fuel.

5. Other prior art found during search includes DE 19509244, DE 19811199 and WO 93/02141 each of which do not utilize solvents in the recycling and its process does not contain step of using PVB as energy source.
